EDUCATION

Graphic Era University

Bachelor of Technology in Computer Engineering

- CGPA: 8.26

Dehradun, Uttarakhand

Sept. 2020 – July 2024

Mother's Glory Public School

Higher Secondary School

- Percentage: 74%

Ramnagar, Uttarakhand

Mar. 2019 – Mar. 2020

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript

Core CS: Data Structures & Algorithms, OOP, Problem Solving

Backend : Laravel, REST APIs, MySQL

Tools & Technologies : Git, Postman, Linux, CI/CD

PROBLEM SOLVING

Solved 150+ DSA problems on platforms like LeetCode and GeeksforGeeks

Strong understanding of Arrays, Trees, Graphs, and Dynamic Programming

Regularly practice problem-solving using C++ and Java

WORK EXPERIENCE

Software Engineer

ASPIA Infotech

July 2025 – Current

Gurgaon, Haryana

- **Developed** and maintained RESTful APIs using Laravel for scalable web applications .
- **Refactored** and **Optimized** complex SQL queries, reducing average response time by 35–40% and improving overall API efficiency.
- **Designed** efficient backend logic to handle large datasets and business workflows.
- **Collaborated** with frontend teams to integrate APIs and ensure seamless data flow.
- **Applied** data structures and algorithmic thinking to improve backend performance.

INTERNSHIP EXPERIENCE

Software Developer Intern

WebMark HQ

Feb. 2024 – July 2024

Dehradun, Uttarakhand

- **Developed** RESTful API endpoints and optimized backend logic, improving response time by **18%** .
- **Engineered** scalable, reusable UI components to streamline workflows, reducing future development time by **30%**
- **Reduced** bundle size by **35%** through code splitting and lazy loading, and frontend performance.
- **Designed** an error-tracking and monitoring system to aid automated testing and debugging, reducing issue resolution time by **45%**.

KEY PROJECTS AND IMPLEMENTATIONS

Moonlit Threads | MERN Stack, Git, Tailwind CSS, Lenis, GSAP, Amazon S3

Jan 2025 – April 2025

- **Built** a cloud-hosted e-commerce platform using the **MERN stack and AWS S3** for image storage and delivery.
- **Integrated** JWT-based authentication and role-based access in production-grade systems.
- **Integrated AWS S3 for fast, secure image storage & delivery**, leveraging signed URLs for optimized performance.
- **Integrated** backend API testing for image categorization endpoints, improving robustness and minimizing failures
- **Prototyped** microservices-style architecture using Java and Node.js, with future scalability in mind.

Movie Recommender System | Python, Numpy, Pandas, Streamlit

Aug 2024 – Sept 2024

- **Designed and implemented** a content-based recommendation engine leveraging data preprocessing, feature engineering, and cosine similarity for accurate predictions..
- Leveraged **Pandas and NumPy** for efficient data preprocessing and feature engineering on movie metadata (e.g., genre, keywords, cast, crew).
- Integrated **TMDb API** o fetch real-time movie posters and enhance the visual appeal of the UI.
